Change Management

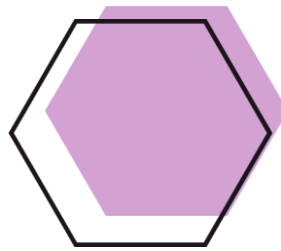

# AGILE TRANSITION

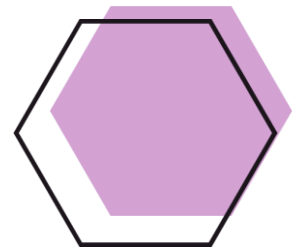

## Environment

We were responsible to lead a team of 20 to 35 people (both internal and external employees) that helps and leads in the transformation of the Waterfall organization into an Agile (SAFe) environment.

## Mission

Stimulated the IT organization to actively commit and deliver on what is planned, whilst reducing the traditional amount of rework after a release.

## Results

Established better global understanding of business requirements and strategic objectives, resulting into software craftsmanship fostering a first-time-right mindset.
